

### Plastic cistern for freestanding WCs

Fixing kit: Included  
 High-mounted cistern  
 Water inlet position: Side left, Side right

The Modul plastic tank is an elegant solution for free-standing toilets. We always offer it with a Dual Flush fitting 3/6 l, including a plastic elbow for connection to the toilet and a 3/8" side water supply. The tank is made of thick-walled plastic with a thickness of 4-5 mm, resistant to UV radiation and thus retains the same white as ceramic toilets. You can place the tank at different heights thanks to the adjustable (200-575).

#### Dimensions

Length: 380 mm.  
 Width: 118 mm.  
 Height: 370 mm.
