

INSTALLATION INSTRUCTIONS FOR IP44 ILLUMINATED MIRRORS

Before installing this product pay special attention to these instructions. It is recommended that this product is installed by a qualified electrician and current building regulations. These products can safely be fitted into Zone 2. See lighting regulations diagram.

1. Prior to commencing work isolate the power supply cable at the fuse box.
2. Check that there are no other concealed cables or pipe work in the intended installation area (check the entire area).
3. The mirror is mounted on the wall by means of two fixing screws.
4. Make sure that it is at the correct height and level. Using a suitable marker through the fixing holes mark the position of the holes on the wall.
5. Using the correct size drill bit for the wall fixing (please note that for certain wall types i.e. plasterboard walls, the wall fixings supplied are not recommended) drill holes in the marked locations. Place the rawl plugs into the holes. Secure using the correct fixings.
6. Then use desired plug and connect with the three-core exposed wires with those reserved on the wall.
7. Fix the mirror to the wall.
8. Finally, switch on the power, then wave your hand in front of the sensor to test the product.

Cleaning Instructions

In order to maintain the quality finish of this product please do not use any abrasives or solvents when cleaning this product. Use only a damp cloth for cleaning this product.

Do not allow water to stand on any part of the mirror.

Please clean any spillage that may affect the quality of the finish as described above.
