

Fortifura Calvi Basin Tap 23cm

INSTALLATION INSTRUCTIONS

Before You Begin

All information is based on the latest product information available at the time of publication. We reserve the right to make changes in product characteristics, packaging, or availability at any time without notice. Please leave these instructions for the consumer — they contain important information.

1. Flush the water supply pipes thoroughly to remove debris.
2. If possible, install this faucet before installing the lavatory.
3. Inspect the supply tubing for damage and leakage. Replace and maintain as necessary.
4. Observe local plumbing codes.
5. Shut off the water supplies to the fitting.

Installation — How to Install the Faucet

1. Connect the screw rod to the faucet body. Place the faucet body and plinth on top of the counter.
2. Insert the fastening screw and rubber seal onto the inlet hose.
3. Insert the hose into the faucet body under the counter.
4. Fasten the screw to the screw rod using a tool.
5. Connect the other end of the hose to the angle valve.

Handle Operation

Turn right for cold water.

Installation Checkout

1. Ensure that all connections are tight and the handle is in the off position.
2. Open the drain. Turn on the main water supply and check for leaks. Repair as required.
3. Remove the aerator. Turn on the faucet handle and run water through the spout for about one minute to remove any debris.
4. Remove any debris from the aerator. Shut off the faucet and reinstall the aerator.

Cleaning Instructions

All finishes: Clean the finish with mild soap and warm water. Wipe the entire surface completely dry with a clean, soft cloth.

Avoid: Cleaners containing chemicals such as ammonia, chlorine, or toilet cleaner can adversely affect the finish and are not recommended. Do not use abrasive cleaners or solvents on faucets and fittings.
